

Year 1 Knowledge Organiser – Spring 1

The Four Seasons

Spring

In spring, the weather starts to get warmer after winter.

- Lots of baby animals are born and new flowers blossom.
- It takes place in March, April and May.

Summer

-Summer is the warmest season of the year.

- Insects such as wasps and bees are around, and plants have lots of leaves.
- The summer months are June, July & August.

Autumn

In autumn, the weather starts to get cooler after summer.

- Many types of leaves begin to turn brown and fall from trees.
- Autumn is September, October & November

Winter

-Winter is the coldest season of the year.

- Many trees have no leaves and many animals are hibernating.
- Winter is December, January & February.

Rain or Shine

Key Information

- Seasons are different times in the year when there are weather changes.
- In places like the UK, there are four seasons in a year: spring, summer, autumn and winter.
- The seasons have an effect on landscapes, and plant and animal life.
- The length of days changes as the seasons change.
- The seasons are different in some other parts of the world.
